

CHIRUDEVA REDDY BUTUKURI

U.A.E, Dubai • f20230331@dubai.bits-pilani.ac.in • +971568747298 • github.com/Chirudeva-Reddy

PROFESSIONAL SUMMARY

A 3rd-year Computer Science undergraduate at BITS Pilani, Dubai, with a growth mindset and strong interest in data science, AI/ML, and computer vision. Actively contributing to academic research and industry projects involving computer vision, big data, ML pipelines, web applications, and system design.

PROFESSIONAL EXPERIENCE

AI Engineer Intern – Nablix Labs

(06/2026 - 09/2026)

Dubai, U.A.E (Hybrid)

- Curated and optimized API endpoints along with a strong focus in debugging issues and reducing the error rate by 42% before production.

Fullstack Developer Intern – Jovens Technologies FZ-LLC

(02/2026 - 08/2026)

Dubai, U.A.E

- Architected and deployed a scalable full-stack web application, integrating Machine Learning (ML) and Artificial Intelligence (AI) algorithms to optimize core platform features, resulting in a 28% increase in processing efficiency.
- Engineered robust Natural Language Processing (NLP) pipelines for automated text analysis and unstructured data extraction, reducing manual processing time by 12% and improving overall system accuracy by 15%.

Software Development Engineer Intern – Domdog

(06/2025 – 09/2025)

Hyderabad, India (Hybrid)

- Created a backend response collection pipeline to validate POST requests, serialize JSON, and store data.
- Developed Python and Playwright automation in Chromium to simulate consumer behavior leading to a 10% increase in test case scenarios.
- Gained experience on how to use the malicious content scanner developed by the company and integrated it with 8 client systems in the duration of 3 months.
- Worked on database querying and data entry, reducing turnaround time by approximately 3 days.
- Curated technical documentation for client-side script integrations, leading to lower calls from customers about queries.
- Applied Search/Generative Engine Optimization practices, increasing the website traffic by 11% .

EDUCATION

Birla Institute of Technology & Science, Dubai

(09/2023 – present)

Bachelor of Engineering (B.E.) Computer Science

Minor in Data Science, To be conferred 09/2027

- CGPA – 9.13/10

Delhi Private School, Sharjah

(04/2010 – 02/2023)

- AISSCE – 95.4% , AISSE – 96.8%

PROJECT WORK

Privacy-Preserving Body Composition Estimation (IJCAI Proposal)

(09/2025 – present)

Creating a pipeline to estimate human body composition from silhouettes under privacy constraints using transfer learning, hyperparameter tuning, and 3-D reconstruction under supervision of Dr. Shivang Agarwal.

NLP insight engine for customer reviews

(01/2026 - present)

Working on creating an NLP pipeline to extract sentiment and key themes from large-scale customer reviews using text preprocessing and clustering.

Road Accident Severity Prediction

(09/2025 – 01/2026)

Built a collaborative 4-member project on crash severity prediction for the Chicago Crash Dataset consisting of over 1,000,000 records. My work mainly contributed to data-preprocessing and interactive risk visualization.

Predicting Student Depression Risk

(02/2024 – 05/2024)

Worked under Dr. Shanookha Ali to build a system using fuzzy logic and artificial neural networks in order to tune and predict continuous depression risk of students from lifestyle and academic factors, achieving 98% training error reduction.

TECHNICAL SKILLS

Programming: Proficient in Python, SQL, Familiar with Java, C and C++

Machine Learning: PyTorch, Scikit-learn, Transfer Learning, Feature Engineering, Model Evaluation

Data Science: Pandas, NumPy, Matplotlib

Computer Vision: OpenCV, Yolov8, Segment Anything Model(SAM,SAM-2), MediaPipe

Tools & Technologies: Git, GitHub, LaTeX, AWS S3, Azure, PowerBI, Tableau, Excel, Word
